

Macson Grind 7380 AM Oil

MACSON GRIND 7380 AM OIL was developed for crush form and other heavy duty grinding operations. It is designed for carbon and high alloy steels.

The product features a very stable, low viscosity oil, which allows rapid settling of fines, keeps grinding wheels clean, and provides excellent cooling and accuracy on the work piece.

TYPICAL PROPERTIES

Viscosity @ 100° F, SUS	70 – 80
Flash Point, COC	310
API @ 60° F	25.5
Weight/gallon	7.5
Total Sulfur	1.65
Active Sulfur	1.2
Chlorine	1.05
Color	Light Yellow
