

Tena-Film All Season 2 Cycle Oil

Approved for: Snowmobiles, Motorcycles, ATV's, Outboard Motors, Ultra –Lights, Chainsaws, Construction and Garden Equipment.

TENA-FILM ALL SEASON 2 CYCLE OIL is the latest and most unique 2-cycle oil developed by the chemists at Baum's Castorine. It is an ashless, BIA certified, oil for service TC-W3. It is scientifically compounded for all 2 cycle air cooled, and water-cooled engines.

The base oil is specially selected 100% de waxed paraffin base, with a proven track record in two previous 2-cycle oils. It was first used in our TENA FILM 2 CYCLE OIL in 1968, and again in our TFI INJECTION OIL in 1980. The compounding of this base oil with detergent dispersant additives, and our exclusive castor additive, provides superior protection against piston scuffing, bearing wear, spark plug fouling, and pre-ignition.

This oil, developed for use in all oil injection systems found in the latest snowmobiles, can also be used with confidence in new and old 2 cycle engines requiring a gasoline/oil pre-mix. The recommended starting ration is 50 to 1 (1-pint to 6 gallons of gasoline). However, for high performance racing engines operating in extreme conditions, the mix ration may be varied according to plug reading and ambient air temperatures. For these conditions, it may be advisable to start at 32 to 1 (1-pint to 4 gallons).

SPECIFIC ADVANTAGES OF TENA-FILM ALL SEASON 2 CYCLE OIL

- Reduces friction. Enhanced lubricity from castor additive.
- Engines run cooler.
- Exerts a powerful detergent action against carbon, tar, gum, and varnishes.
- Greatly reduced exhaust smoke and pollution by-products.
- Superior anti-rust protection during storage.
- Increases spark plug life. Electrodes stay clean.
- Quick miscibility with gas – dyes gas green – avoids mistakes,
- Excellent injection pumpability in conditions of extreme cold – to minus 30° F.

POINTS TO REMEMBER:

This unique 2-cycle oil will assure the dependability of all of your 2 cycle engines – one oil for all applications. No matter what the speed, load, or conditions, your engine will have the finest lubrication possible. We invite you to compare this oil with any other oil on the market today. We feel confident you will be able to notice an improvement in performance with the first few tanks of gas.
