

## Coolant Conditioner 122

Coolant Conditioner 122 contains emulsifiers and a pH buffer system to reduce emulsion particle size and boost the pH in copper wire drawing systems. It helps to restore lubricity and detergency of wire drawing lubricant. It will help restore the cleaning ability of the lubricant emulsion as well.

### TYPICAL PROPERTIES

Solubility in Water:	Solvent
pH of Product:	11.0
pH of 5% Solution:	10.7
Flash Point:	None
Specific Gravity @ 60° F.:	1.04
Weight per Gallon:	8.67 pounds per gallon
