

Presto Industrial Liquid Hand Cleaner

PRESTO INDUSTRIAL LIQUID HAND CLEANER is a new type viscous lotion cleaner. It is a special blend of emulsifiers and detergents that readily combine with petroleum soils and a wide variety of organic and inorganic soils. The viscous nature of the formula maintains tenacious contact with the soil until it has penetrated the dirt and lifted it from the skin. Rinsing with water instantly completes the emulsion process and the dirt is gone. The effectiveness of these emulsifiers is better than most of the leading waterless types and equal to or better than the liquid-solvent-abrasive formulas. PRESTO is also more effective than the powdered hand cleaners.

All of the formulas that employ solvents are generally very harsh on the skin after repeated use, even with lanolin in them. The chemicals used in PRESTO are very mild to the skin, yet they have the ability to combine and remove grease and oil readily. All ingredients in the product are biodegradable. There are no abrasives to clog drains and dispensers and no solvents to create a water pollution problem. Abrasives, such as pumice, in liquid formulations, also tend to settle to the bottom of containers over long-term storage, thus retarding their effectiveness.

OUTSTANDING CHARACTERISTICS:

1. Grease, carbon, oils and inorganic soils are easily removed.
2. Non-Polluting: PRESTO is biodegradable and does not contain solvents or abrasives.
3. Stable: PRESTO remains stable indefinitely in storage without loss of effectiveness.
4. Contains LANOLIN for added skin protection. PRESTO does not irritate or sting minor cuts or abrasions. This is an important feature to mechanics that have to constantly clean dirty hands.
5. Contains an ANTI-SEPTIC agent (para-chloro-meta-xyleneol) for added protection.
6. Pleasantly perfumed to leave hands clean and fresh smelling. Office personnel like it as well as factory workers.

NOTE: PRESTO is not intended for use in removing hectographic inks or tar.

For Light Duty cleaning, PRESTO can be cut 50 – 50 with water, for use in liquid soap dispensers found in restaurants, hotels, motels, schools, municipal buildings, stores, etc., with no clogging effects.

SPECIFICATIONS

Color:	-	Light Green
Appearance	-	Viscous – lotion
pH:	-	9.7
Specific Gravity @ 60° F.	-	1.012
Weight per gallon	-	8.44

DIRECTIONS FOR USE:

1. Do not wet hands
2. Apply PRESTO directly to the palms and work in thoroughly to emulsify the soil.
3. Rinse with water and DRY the hands.
