What is tree risk survey & why?

Systematically drive each street in a community or walk a property, identify and catalogue trees with defects present that may represent a risk to people and property and make management recommendations to reduce those risks.

It is the responsibility of managers to identify and take appropriate measures to reduce tree related risks located on the properties they manage. A tree risk survey is an efficient methodology to identify, and develop work plans and budgets to manage these risks.

Who can use these services?

Any manager that is responsible for the management of trees in a community or on a property should be managing tree risks. Who should be managing tree risk?

- Municipalities
- University or Educational Campuses
 - Golf Courses
 - Business Campuses
 - Property Managers
- Managed Residential Communities
 - Military Installations
- Electric Distribution Companies

Successes

Urban Forestry, LLC has completed numerous tree risk surveys for clients including the City of Geneva, NY, Towns of Brighton and Greece, NY, and Rochester Gas and Electric Corporation. References are available upon request.
