What is a program evaluation?

Is your tree management program effective and cost efficient? How do you identify work that needs to be completed and to what standard? Are you completing work on an as needed basis or bidding work in large quantities. Urban Forestry, LLC will evaluate your current management practices and costs and identify opportunities to enhance your program and ensure you are meeting your tree management needs in the most cost efficient manner.

What is included in a program evaluation?

The following is a list of the services that may be included in a program evaluation.

Urban Forestry, LLC will develop a proposal depending on your needs and budget.:

- 1) A statistical sample inventory of trees. A one percent sample will provide accurate estimates of the number of trees, condition and management needs.
- 2) Workload estimates. Based on the sample inventory, annual workload estimates will be developed.
- 3) Cost estimates. An estimated annual budget will be developed to meet the annual workload estimates.
- 4) Standards and Specifications. Evaluate your work standards and specifications to identify any deficiencies as it relates to current standards.
- 5) Program Evaluation. Urban Forestry, LLC will evaluate your current management practices and costs versus the estimates of your needs and provide recommendations to improve management and contain costs.

Urban Forestry, LLC provides the highest quality, most cost efficient and responsive tree management services available. Please call us if we can be of assistance.
