

Tena-Film No Melt Grease No. 432

Tena-Film No Melt Grease No. 432 is designed as a cable lubricant for high and low temperatures. The grease is fortified with additional extreme pressure additives, oxidation inhibitors and a metal deactivator to provide non-corrosive properties and long lubricant life at high temperatures. The consistency provides easy application to the cable without heating. The no melt feature insures that the grease will stay put.

SPECIFICATIONS

Worked Penetration @ 77 °F	410 – 440
Color	Translucent Tannish Yellow
Water	0.1%
PH (5% grease in distilled water)	7 – 8
Sulfur Content	Less than 1%
Dropping Point	None
Mineral Oil, % minimum	96.0

Properties of Base Oil:

Viscosity @ 100 °F, S.U.S	800
Flash, °F Minimum	475
Pour Point	0 °F
Specific Gravity @ 60 °F	0.891
Weight per gallon	7.42
Timken OK Load Test	55 lbs.

Norma Hoffman Oxygen Bomb Test, lbs. sq. in. pressure drop in 100 hrs., operation, Max.	2
