

# Woods Valley Daily Conditions Report

Date / Time of report: **Sunday, April 2, 2017 – 8:05am**  
 Current Temperature: 33  
 Current Wind / Sky: Calm winds and patches of blue sky.  
 Today's Forecast: High 47 degrees, W Winds 5 to 10 mph. Partly Sunny  
 Hours of Operation today: **Ski - 10am to 4pm** : Snow Tubing – closed for season

**POND SKIMMING is today at 1pm. Registration in the main lodge starts at 10:30am. Season Passes are on sale now – purchase your pass for next season now and ski free today while locking in the best rate for all of next season. Are you a pass holder at another ski area? If so, present your current pass at our ticket window for a \$15 Night lift ticket. Hours today are 10am to 4pm. Live Music The Old Main – 2:30 to 5:30pm. Expect a Wet Granular and Spring Surface Condition for skiing and riding today.**

Trails Open	Day – 11 of 21
Lifts Open	2 of 6 lifts
Base Depth	6 to 32in. Some areas of thin cover and some wet areas.
New Snow	2 inches on Friday
Surface Condition	Wet Granular / Spring Condition
Surface Notes	All open trails have been groomed. Expect a fast and wet granular surface today. Spring conditions.

Lifts	Status	Hours of Operation
I – Big Chair – Double Chair	Open	10:00am to 4:00pm
II – Small Chair – Double Chair	Closed	Closed
III – T-Bar – Surface Lift (weekends/holidays)	Closed	Closed
IV – Sun Kid Wonder Carpet	Open	10:00am to 4:00pm
V – Learning Carousel	Closed	Closed
VI – Snow Tubing Wonder Carpet	Closed	Closed

**What's Happening at Woods Valley - Sunday – April 2<sup>nd</sup>.** Conditions today will be spring like with Wet Granular and Corn Snow slope surfaces. Lower Park is open with two jumps. We have closed our rails and boxes. Please scope all open features before using them. Never use features marked as closed. Look before you leap.

**Live Music Sunday - The Old Main – 2:30 to 5:30pm** Join us for great live entertainment. **Pond Skimming action starts at 1pm at the bottom of Timmy's Run. Registration for the event starts at 10:30am in the main lodge. \$5 donation to skim will benefit our Ski Patrol.**

As always, dress appropriately and enjoy some good clean fun in the great outdoors. ALWAYS Ski and ride in control and with caution. **Know The Code.** Check our Events section on the homepage / or our Facebook site for details. Please make plans to join us for skiing, riding, tubing, and live music.

Please stay up to date by visiting our website [www.woodsvalley Ski area.com](http://www.woodsvalley Ski area.com) and Facebook [www.facebook.com/woodsvalley](http://www.facebook.com/woodsvalley)

Difficulty	Trail Name	Status	Snowmaking	Groomed	Night Trail ?
Easiest	Easy Acres	Open	No	Yes	Yes
Easiest	Learning Zone	Open	No	Yes	Yes
Easiest	Broadway	Open	No	Yes	Yes
Easiest	Fly Away	Closed	No	No	No
Easiest	Round About	Open	No	Yes	Yes
Easiest	Side Winder	Closed	No	No	No
More Difficult	Copy Cat/Lower Park	Open	No	Yes	Yes
More Difficult	Bowl	Open	No	Yes	Yes
More Difficult	Upper Timmy's	Open	No	Yes	Yes
More Difficult	Short Cut	Open	No	Yes	Yes
Most Difficult	Peppers Pride	Open	No	Yes	Yes
Most Difficult	Sting	Closed	No	No	No
Most Difficult	Timmy's Run	Open	No	Yes	Yes
Most Difficult	Snow Park	Open	No	Yes	Yes
Most Difficult	Deer Glade <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No
Most Difficult	Freya's Woods <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No
Most Difficult	Woody's Way <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No
Most Difficult <b>Use extra caution</b>	Rabbit Hole <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No
Most Difficult <b>Use extra caution</b>	Valkyries <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No
Most Difficult <b>Use extra caution</b>	Valhalla <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No
Most Difficult <b>Use extra caution</b>	Hemlocks <i>(all-natural skiing)</i>	Closed	No	No – Natural Terrain	No

Note: Indicates freestyle terrain. \* S/M Piles = ungroomed piles of new manmade snow.

**Note about All-Natural Skiing areas (Gladed Trails):** Please honor all ropes and signs. Use extra caution. Surface is not maintained. Many obstacles exist. Please ski with a friend.

NOTICE: The lift operating schedule, status of open/close trails, and snow conditions are subject to change throughout the day as a result of weather, skier/snowboarder traffic, and other influences beyond our control. Be aware of changing weather conditions. Natural and manmade obstacles exist. Snowmaking and Grooming activities are routinely in progress on trails designated as open. SKI AND RIDE WITH CARE. This report reflects the daily operational plan. Changes to this plan may occur from weather, snow conditions or other factors during the day or night.

**Snow Conditions Codes and Definitions:** The following surface condition codes and definitions explain the type of snow surface reported at Woods Valley. Woods Valley endeavors to inspect trails and report conditions consistent with terminology descriptive of surface condition(s) developed by the New York Ski Industry Association, Ski Areas of New York, Inc. These are approved by Article 18, the New York Safety In Skiing law.

**MG = MACHINE GROOMED.**

**BS = BARE SPOTS** - Areas of exposed underlying trail surface NOT covered with sufficient amounts of any form of snow, ice or other skiable material. No skier should attempt to ski over or through any Bare Spot or Spots.

**CO = CORN SNOW** - Large ice-like granules, which are loose during above-freezing temperatures and which freeze together during below-freezing temperatures. Corn snow is usually a product of the above/below freezing cycle of temperatures typical of spring days. Large ice-like granules which remain frozen together in extended cold periods, or chunks of ice created by incomplete grooming or icy surfaces are not characteristic of corn snow.

**FG = FROZEN GRANULAR** - Granular snow which was once wet and which has frozen together forming a rather solid or crusty-textured surface. It can return to loose granular after thawing or being worked by a grooming machine or from the effects of skier traffic breaking up the crust. Frozen granular snow will support a ski pole stuck into it. However, if the pole makes ice chips and the surface will not support the pole, the surface is ICY. **HP = HARD PACK** - Hard pack snow is a dense, compressed snow condition harder than packed powder and softer than ice.

**IP, IS = ICE PATCHES, ICY SURFACE** - Ice represents a hard, glazed surface usually created by freezing rain, or old surface snow melting and quickly refreezing again, or by ground water seeping up into the snow and freezing. Also may describe a very wet surface that has been skied into a smooth surface while above-freezing temperatures are existent and then rapidly dropping temperatures occur. When broken, ice breaks into chunks rather than granules. Patches describe localized occurrences of ice; surface describes a more prevailing icy condition on the slope.

**LG = LOOSE GRANULAR** - Loose granules similar to rock salt, usually formed after powder snow thaws, refreezes and crystallizes or an accumulation of sleet. Loose granular may also characterize surface conditions produced by machine conditioning of frozen granular or icy surfaces.

**P = POWDER** - New snow generally of dry and fluffy consistency. Will not make a snowball easily.

**PP = PACKED POWDER** - Loose powder snow compacted by rollers, drags or other mechanical apparatus or by skier traffic to a state which leaves little air space between particles. It is no longer fluffy, but it is not so extremely compacted that it is hard and icy.

**SC = SPRING CONDITIONS** - This term is used to characterize the wide variety of surface conditions which results from the alternate freezing and thawing of snow cover in spring weather. This term is used in place of other terms when the usual surface descriptions cannot accurately or completely describe the situation, that is, when no single surface type covers at least 50% of the skiable surface of a trail.

**TC = THIN COVER** - Indicates that the cover that currently exists will decline in quality due to skier traffic and may break through to the underlying trail surface. Thin Cover indicates that Bare Spots are anticipated to develop in the area during the day.

**V = VARIABLE** - A wide variety of conditions which cannot accurately or completely be described using usual terminology, such as when no single surface type predominates.

**WG = WET GRANULAR** - loose or frozen granular snow which has become wet and soft after a thaw or from a rainfall.

**WP = WET POWDER** - Powder snow that is wet when it falls (you can easily make a snowball) or dry powder that becomes wet as the temperature rises above freezing or is dampened by rain.
